Automatic Temperature Control	\$3,200.00
*Crating Charge:	\$135.00

Price: \$5,850*

"We've had our Ceramic Services Downdraft Kilns with their Automatic Temperature Control System for about 2 years, and we fire them daily.

We have seen a substantial savings in our fuel costs — at least a 30% savings . . . these are really good kilns, workhorses. The glazes are so much more brilliant.

I've been firing kilns for over 30 years, and I highly recommend Ceramic Services' kilns and their controller."

— Peter Coussoulis, Ceramic Dept. Supervisor, Walnut Creek, CA Civic Arts Education Center
